

- Using techniques and equipment you have used this semester pose a testable hypothesis that you are interested in and can be investigated considering the time, monetary and equipment constraints of the lab.
- Write up a one page proposal (you can use the form below) and submit it to your TA NO LATER than during Lab #3.
- Schedule a time during Week #3 to sit down and discuss this proposal with your TA. This meeting will be to determine if the plan of action is doable and appropriate. In addition needed equipment and supplies will be determined at that time.
